

WATER WITCH
multi-purpose pollution control, marina & waterway maintenance
workboats

A flexible and efficient transport and storage solution.

Our unique range of modular Skip Barges allows recovered debris and waste to be stored and transported using transfer skips employed by waste removal contractors world-wide.

Loading and discharging fully-laden skips is fast, and without any manual handling, enabling Water Witch operators to immediately resume work.

Each barge features quick-connect couplings to allow additional units to be connected to suit capacity requirements

- Road transportable
- Heavy-build 6mm steel construction with four water-tight compartments for safety
- Provide an efficient and cost-effective solution to storing and transporting recovered debris, litter, aquatic weed, logs, silt or oil
- Offer a highly flexible range of storage options to meet each customer's individual requirements and waste transfer systems

Transfer Skips

Fully welded transfer skips manufactured to standard skip dimensions for handling by waste transfer vehicles. Tank skips for storing liquid and recovered oil also available.

Outline Specification
