

WATER WITCH
multi-purpose pollution control, marina & waterway maintenance
workboats

Multi-purpose litter collection and retrieval boats for marinas, harbours and waterways.

- Versatile
- Cost-effective
- Simple to operate

Specifically designed for maximum stability, ease of operation and low cost of ownership, the Buddy features a unique interchangeable pod system which allows a large number of tasks to be undertaken safely and cost effectively.

These innovative workboats offer an efficient solution for the removal of floating litter, debris and vegetation.

The multi-purpose drop-in pod system can also accommodate oil recovery, fire fighting, dispersant spraying, boom deployment and cargo hauling equipment.

A four stroke outboard provides economical, whisper-quiet performance and the design of the hull ensures low wash for minimal disturbance when underway.

Flat sides and wheeled fenders make it possible to drive along dock walls. Inward flared bows force litter, debris or vegetation in the boat's path into the collection basket. A non-return gate at the rear prevents contents being forced out when the vessel is put into reverse. Cutaway transoms allow the Buddy to pull away from quay walls with ease, adding manoeuvrability when working in confined water spaces.

Outline Specification	6m	7m
Length (Hull)	5.83m (19')	7m (23')
Breadth (Hull)	2.3m (7' 6")	2.3m (7' 6")
Depth	0.7m (2'4")	0.7m (2'4")
Operating Draft	0.2m (8")	0.2m (8")
Displacement	700kg (1543 lbs)	1200kg (2645 lbs)
Engine	15hp-30hp (11kW-22kW)	

7m Buddy with wheelhouse

Deck plates provide a 13m² working platform

Drop-in Pods & Accessories

Litter Collection Basket
2.6 cubic meter capacity collection basket with remote-operated front door

Cargo Pod
Designed to carry up to 1 tonne of equipment.

Bow Ramp
Heavy-duty loading ramp

Pot Puller / Davit
With manual or powered winch.

The Buddy is manufactured from high quality 4mm marine grade aluminium for low maintenance, durability and strength. The sealed hulls offer excellent buoyancy, stability and carrying capacity. Safety handrails and operator canopies are easily removable for added versatility.

Drop in deck plates provide 13m² of working space – ideal for work platform, personnel transport or safety support roles. The cargo pod is designed for easy handling and will carry up to 1 tonne of equipment.

The Buddy features built-in lifting points for easy handling and can be transported by road on a custom-built launch and recovery trailer. The craft also ships economically in standard containers.

The hull is available in a range of deck and console configurations to suit operator requirements. Equipment options include oil recovery and containment systems, storage solutions, fire pump & underwater weed cutter.

Weed harvesting with collection basket
